Unconfirmed Load Requirements Form

Distribution Engineering · Document the preliminary system requirements for a connection request.

BC Hydro
Power smart

USE & LIMITATIONS

This review and preliminary scope assessment **does not reserve** circuit capacity.

Once load is confirmed, a **Confirmed Load** DESRT request is required for detailed requirements.

LIKELIHOOD KEY

High — very likely to be required.
Medium — moderate chance of being required.
Low — unlikely, but not ruled out.
Required — confirmed for this project.

HIGH-LEVEL REQUIREMENTS ASSESSMENT

Rate the likelihood of each requirement and outline potential scope. This assessment **does not reserve circuit capacity.**

Local Protection Device e.g. fuse, recloser, vista switch — Select —	*Tip: paste a screenshot or image directly into this field.*	*Tip: paste a screenshot or image directly into this field.*
Feeder Topology Modifications e.g. new feeders, load transfers — Select —	*Tip: paste a screenshot or image directly into this field.*	*Tip: paste a screenshot or image directly into this field.*
System Civil Works e.g. feeder ducts, maintenance holes — Select —		

Tip: paste a screenshot or image directly into this field.

Tip: paste a screenshot or image directly into this field.

Primary Line Modifications

e.g. voltage regulators, reconductoring, 3-phasing
